

HealthyHome Total Property Solution

Twin Component Salt-Free Filtration & Conditioning System

Automatic Whole-House Filter/Conditioner

Exterior Main Line Conditioner

Health

Eliminate waterborne chemicals from your home living environment. No more bathing in potentially harmful chlorine and chemicals. 100% compatible with all ionizers.

Taste and Quality

Enjoy high quality, chemical free water for drinking, cooking, ice and all household uses.

Environment

Bottled water requires a large carbon footprint. 38 billion plastic water bottles end up in landfills every year. Salt from old fashioned water softeners is damaging the environment. Put a stop to it now!

Hard Water

Reduce hard water buildup and damage to fixtures, plumbing, water heaters and appliances. Get better results while bathing, washing clothes and in your dishwasher. Critical for tankless water heaters, insuring their warranties remain valid.

Landscape, Pool and Water Features

Enhance plant growth with less water and fertilizer, minimize staining in pools and water features, and protect costly pool heaters and pumps. Exterior Conditioner optimizes scale reduction inside home.

Economics & Convenience

Save money by eliminating bottled water, reducing soap and detergent usage, and increasing the life of plumbing, fixtures and appliances. No costly filters to change - set it and forget it.
